

Draft Joint Health and Wellbeing Strategy 2015/18

Later comments and proposals:

1.
 - Would be helpful to add in data on children subject to child protection plan and Looked after Children (LAC)?
 - Statutory LAC guidance requires 'Health needs (including emotional and behavioural needs) of LAC taken into account in Joint Strategic Needs Assessment (JSNA) and Joint Health and Wellbeing Strategy (JHWS) – identify gaps and inform strategic priorities'
 - Include in what will change: Outcomes for LAC will be on a par with wider population
2.
 - Should we note Milton Keynes' higher than national average of people from communities practicing Female Genital Mutilation (FGM)?
 - Need to work with our Black and Minority Ethnic (BME) communities to reduce harmful practices including female genital mutilation
3.
 - Develop whole community approach to support people with learning disabilities and Transforming Care strategy to support people within their local area.
 - Include in what will change: People with learning disability will be supported within their local community
4.
 - It's interesting that mental health issues is written to cover all three areas, but end of life care and more importantly end of life care planning is not mentioned. Following on from events like dying matters week, we need to keep the conversations going.
