John Campbell, QPM, Chief Constable of Thames Valley Police Force
Gavin Sandman, Head of Youth and Community Services, Milton Keynes Council

Dear Local partnership

Action plan following the JTAI in Milton Keynes

Many thanks for sharing your local partnership's action plan responding to the findings of the joint targeted area inspection in your local authority area.

Ofsted, the CQC, HMICFRS and HMI Probation have reviewed the action plan. CQC have identified an aspect of the plan that suggest an amendment to the plan is needed.

The sections that apply to health organisations show an accurate understanding of the findings, but we have an observation to make in relation to the two actions identified for MKUHFT at 26 and 27 for paediatric and A&E staff. These items indicate that part of the solution lies in the provision of integrated safeguarding training for adults and children at level 1 and 2. Paediatric staff and urgent or unscheduled care practitioners are specifically identified in the intercollegiate guidance as requiring additional knowledge, skills and competencies over and above core level 3. So levels 1 and 2 would not meet those needs. This should be clarified as part of the health oversight of the action plan.

The inspectorates will use your action plan to inform the lines of enquiry of their next joint or single agency inspection of the local agencies.

We would like to thank you and your partners again for your cooperation with the inspection team.

Yours sincerely,

Wendy Ghaffar HMI
