

Parking Occupancy Maps

The Council undertakes yearly occupancy counts of the car parking areas in Central Milton Keynes. The attached maps show the occupancy percentages taken at various times throughout the day, on a weekday, Saturday and Sunday.

Attached is the data taken in June 2017, June 2016 and December 2015. Prior to 2016, the Council additionally conducted December counts near to Christmas. These tend to show higher parking occupancy close to the shopping areas when compared to the June counts.

The June counts are considered to be more useful for showing general parking usage away from exceptional busy periods such as the festive season and therefore a survey was not conducted in December 2016.

The information on the data sheets needs to be read in conjunction with the attached Parking Guide as this makes the zones referred to in the data easily identifiable.
