

## Community Safety Forum Agenda Friday 5 October 2012

**AIM:** The past two years have brought about a time of change across the partners in the partnership. The Community Safety Forum aims to educate people on the changes and future changes that have and will take place and review how the partnership can effectively work together to move forward.

The main aim is to have a product at the end of the forum. Focus will be on the PCC and how the partners can interact and engage to fund projects in the future. The forum will be used as an opportunity to consult and gather opinions from partners.

The product at the end will be a document, around 6-10 pages long, that can be presented to the PCC to provide an overview of community safety within Milton Keynes. The document will include the following:

- > A summary of the strategic assessment
- > A must and risk section which concludes a list of the activities that must be kept running alongside an analysis of the risk if the activities are not carried on.
- > Emerging themes from the forum will conclude a list of areas that could be invested in

	ACTIVITY	SPEAKER	AIM
