### ITEM 7. HINDHEAD KNOLL ALLOCATION

Resolved-

1. That the report be noted
2. That the Head of Planning be requested to report the following recommendations in respect of modifications to the Planning Improvement Board;
  - a. That when officers log a capacity, density etc change to the advice given about a site that effectively recommends a change to a local plan policy, they annotate the record clearly to show whether the change logged is the result of a direct past public decision on that site ("prior decision") or whether it is the result of an officer's judgement, ("judgement") albeit perhaps informed by other relevant decisions.

- b. That they add at least a phrase indicating the reasoning behind the change, and the prior decision reference if any.
- c. That they also log their name (to be held internally) in case of future queries.
- d. That when such changes are submitted to future Cabinet member, CAG or other member advisory groups or for public consultation the types of changes be split up in separately headed tables so that it is clear which are new decisions to be consulted on and approved and which are the result of prior MKC decisions or typing errors or Inspectors decisions.
- e. That all changes marked judgements are submitted to the Local Plan CAG or equivalent for confirmation and then included at the earliest possible point in public consultation before being included in the Local Plan.
