

Dear Rachel

As part of the hearing notifications I also give parties an opportunity for any additional documentary evidence to support their representation and after seeking legal opinion I am forwarding this on to you having received it from Mrs Nunn of no57

There are two documents.

The first is an email sent to her last year by Environmental Health in respect of a noise complaint she made including a response from your site operator

The second is screen shots of your operators Facebook account in respect of representations for this application

You will see the language that is used. The Nunn's feel this is directed at them and does not show your DPS and operator to be a responsible person

You will note that one of the comments on the page is from a person who has made a positive representation (Germaine Newnham).
