(g) Completion of work	1	17	3	2	1

Many trees and shrubs planted on Council estates not annual pruned. Interfere with the free passage of pedestrians on footpaths. Grass verges in bad state of repair with no repair work carried out for several years. No action against car owners parking on grass verges. Very poor weed control, road to kerb areas. Mowing of grass areas, grass not collected but left on public footpaths, dangerous to the disabled, children etc when left in wet rainy periods. Cost cutting has reduced standard of landscape maintenance.

The Clifton Reynes verges have over the past few years become less and less attractive and need defining. This is partly due to hedge and general weed invasion due to poor mowing and maintenance.

No weed killing has been carried out in the parish of Emberton to date. Edges now need cutting back to restore path widths.

The Parish Council is happier now with verge maintenance than it has been for some time, largely they believe because of the contract supervisor. One issue that causes great consternation is parking on verges. Similarly, no sooner is everything looking nice when another cable supplier, even Council workers come along and rip it up and never is well reinstated, if at all.

Grass has grown more quickly this year, neither of the contractors have adjusted to this. Unsightly clumps of dead grass left after a visit being the norm both on grass verges and in the Recreation Ground. The local cricket club has been unable to play home games because of very poor state of the outfield. It is accepted that part of the fault lies with the Parish Council for not specifying the standards they required. Do Synergy have the equipment to meet the needs of the village which are equal to those of clubs in Milton Keynes and if yes how much different would the costs be.

Manor Road cul de sac is only half maintained some verges are cut others left. Durrans Court pathway leading to no47 is extremely overgrown blocking light from the flats. No brambles cut out at the cemetery. Fenny so they are left to overgrow in the gardens of Manor Road. Brambles should be cut back to the ground Sept/Oct and the remaining stump treated with a strong shrub killer. The remaining hedge would only need cutting back every three years Sept/Oct not springtime when birds are nesting.
